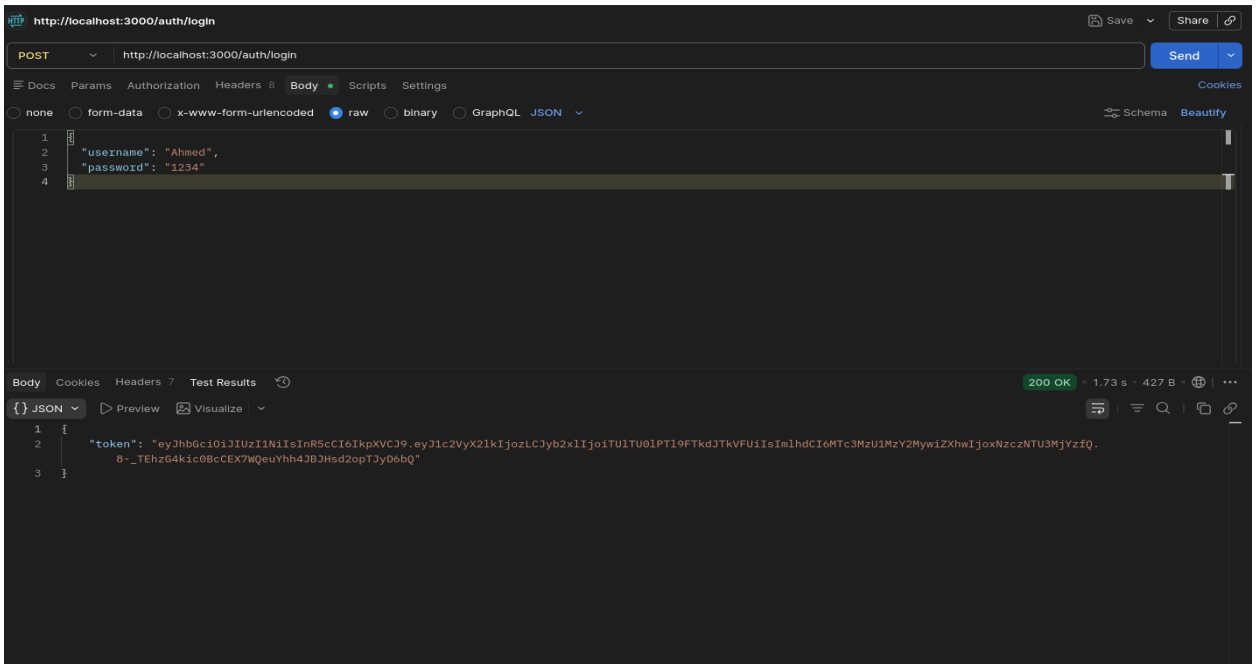
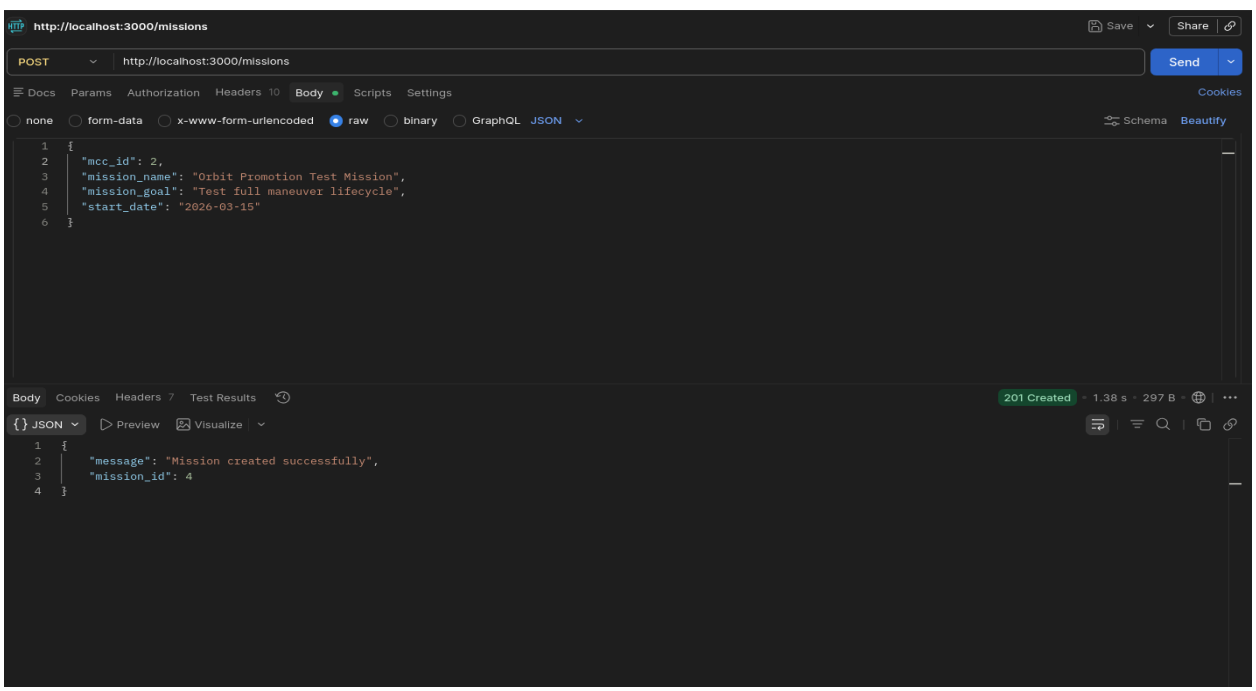
Promoting a Satellite to Higher Orbit

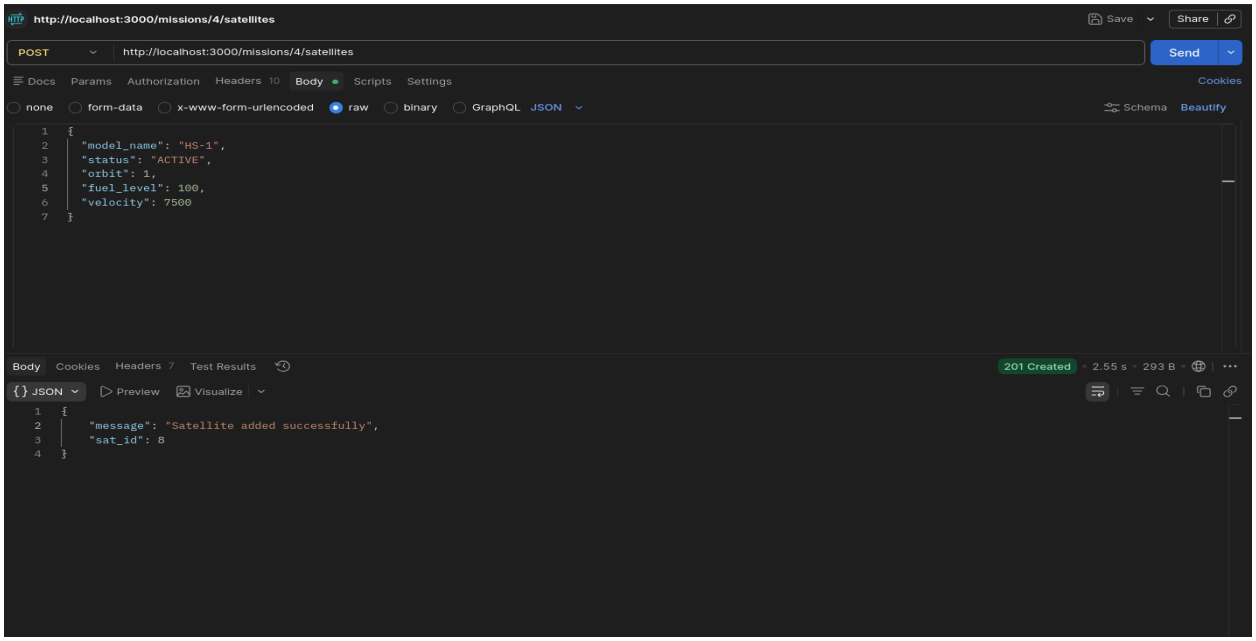
- **Login**



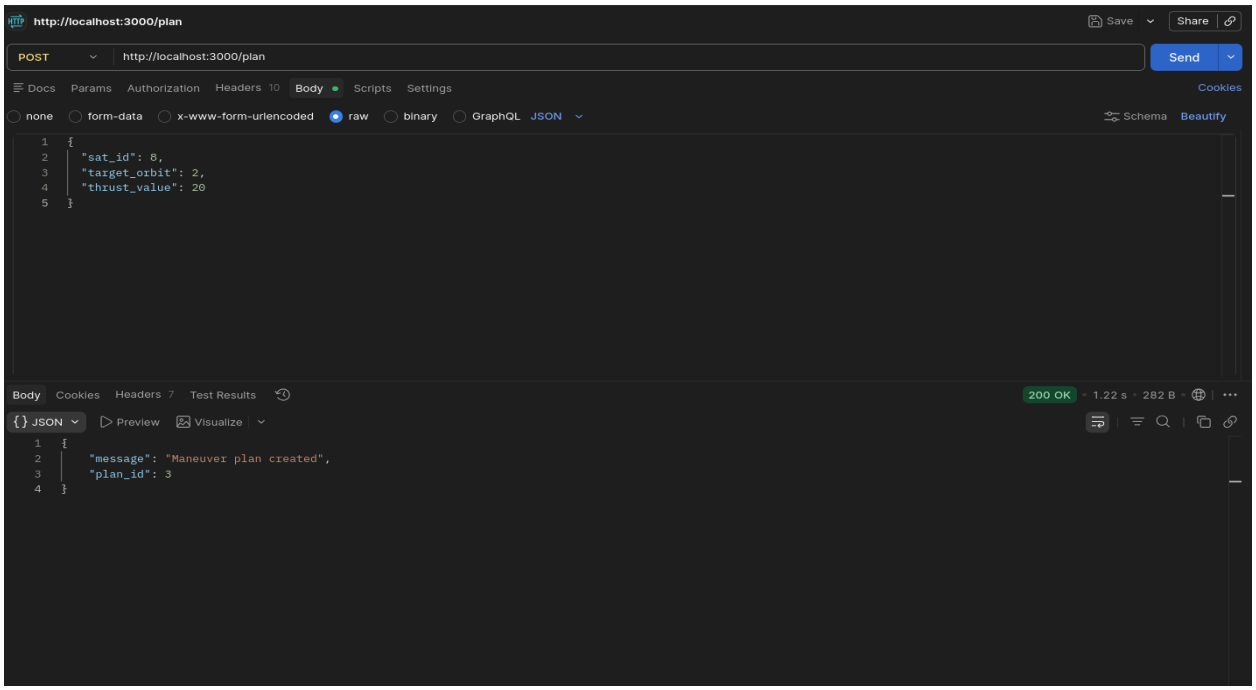
- **Creating Mission**



- **Adding Satellite to Mission**

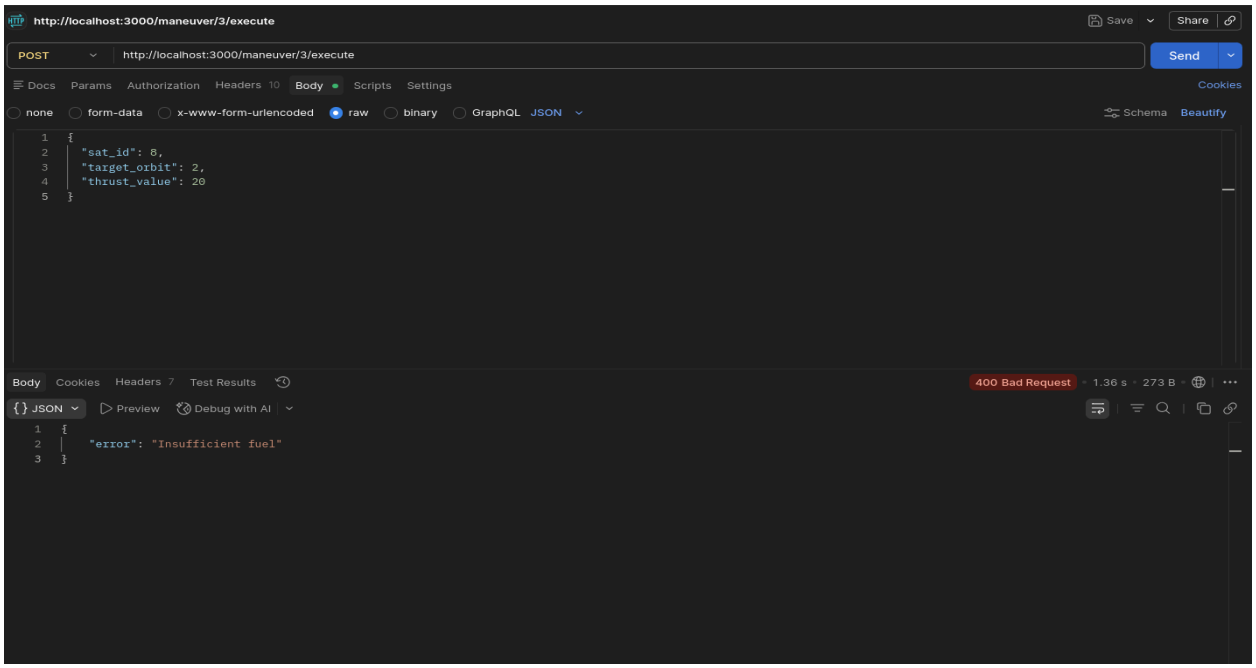


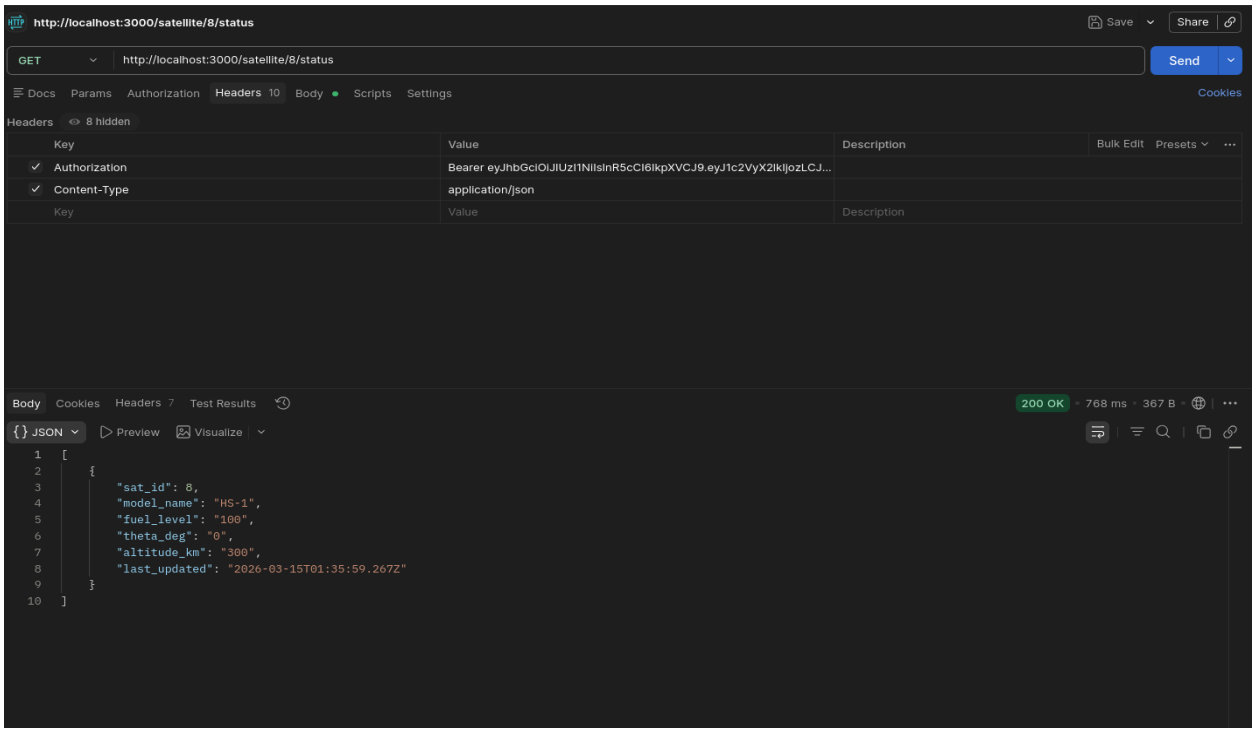
- **Creating Maneuver plan**



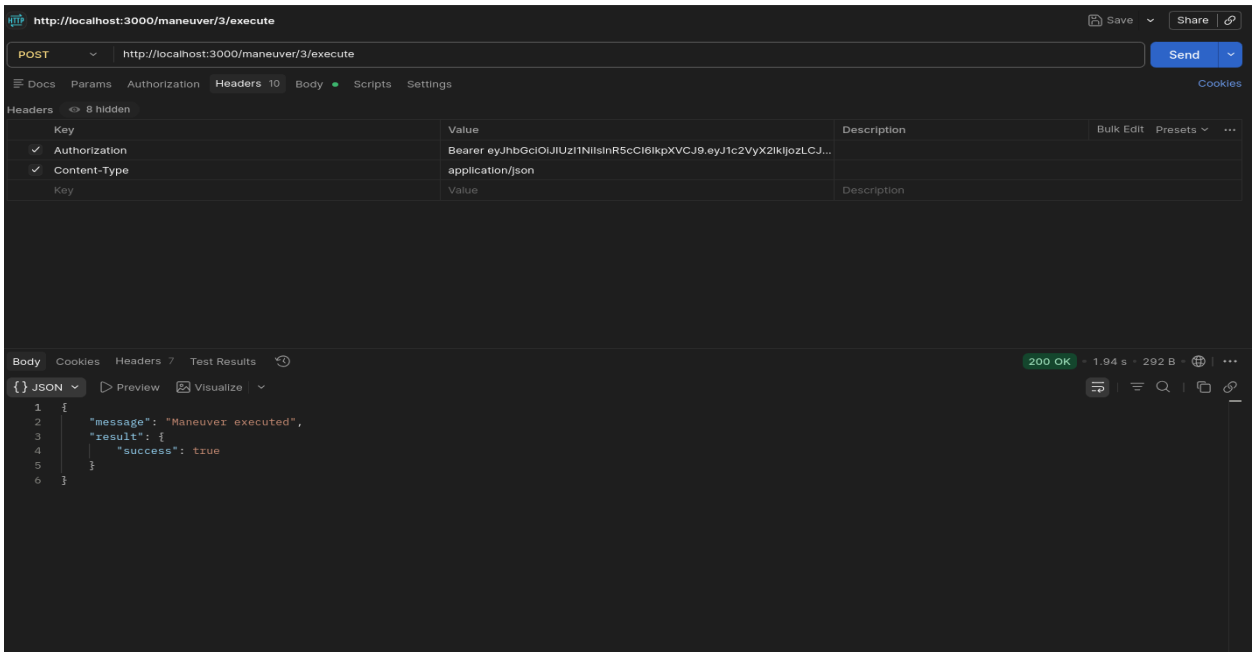
- **Executing Maneuver**

In case of insufficient fuel (none of the transaction changes took place as shown in the next picture)

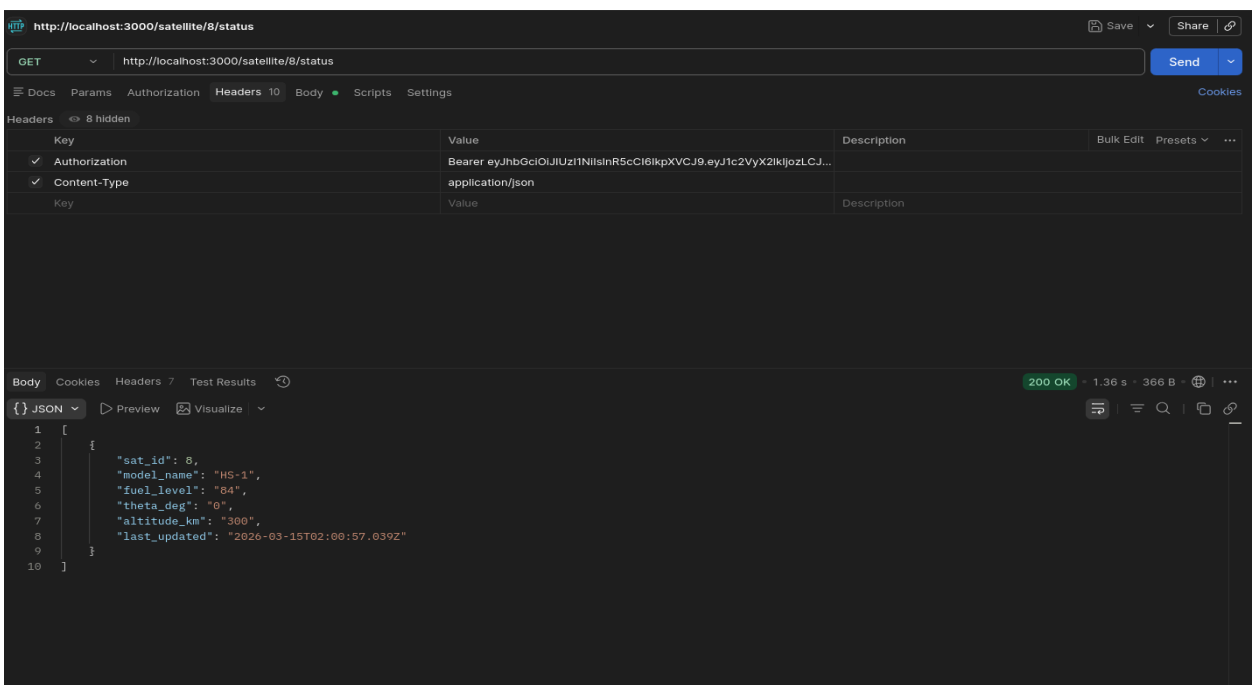




- **Successful transaction**

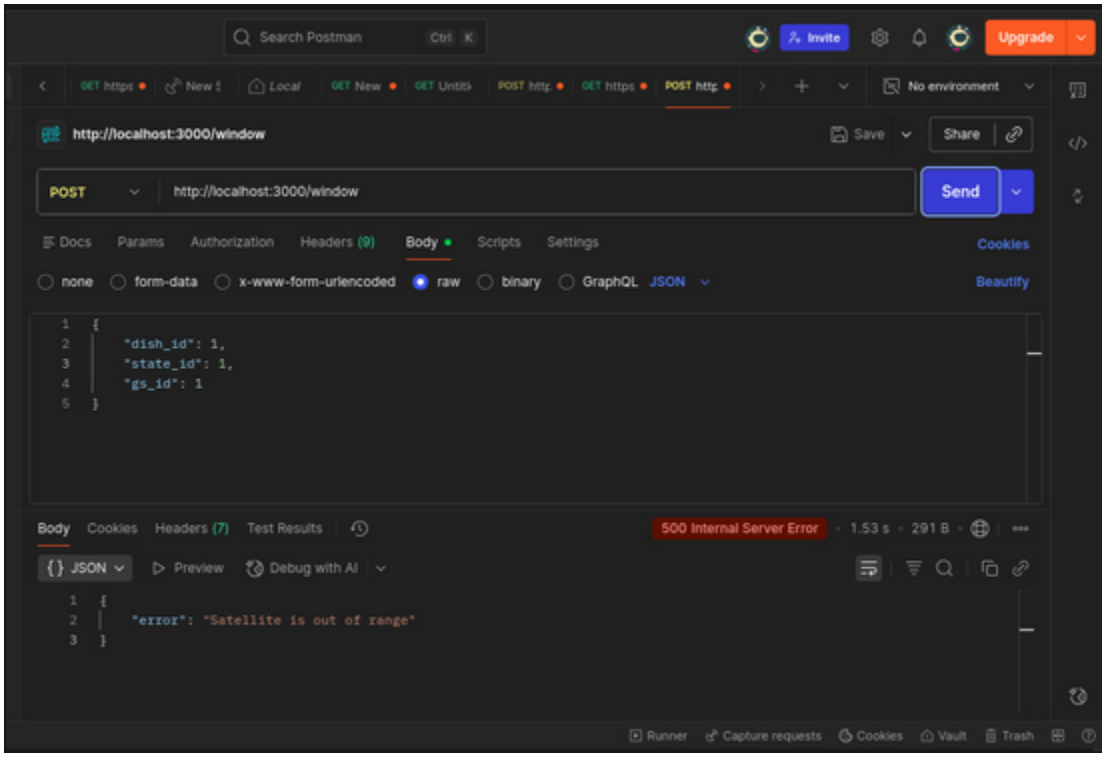


(Look at the updated fuel_level)

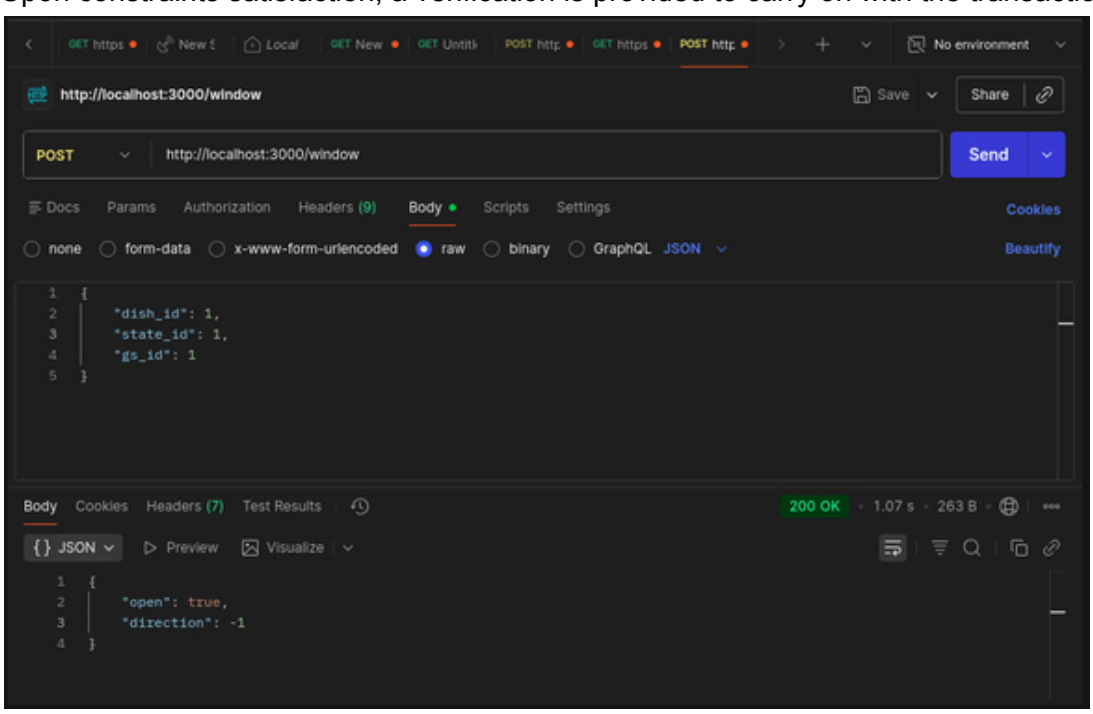


Establishing a Communication Window

Several constraints are compared before establishing a communication window

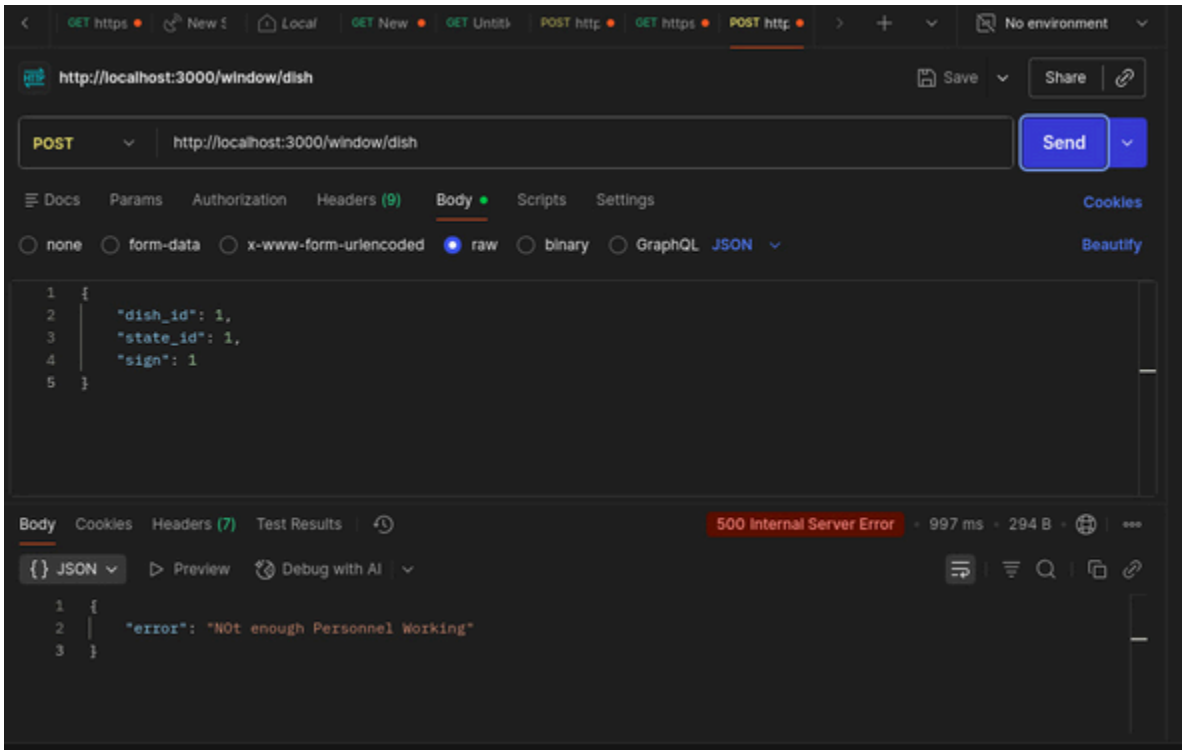


Upon constraints satisfaction, a verification is provided to carry on with the transaction

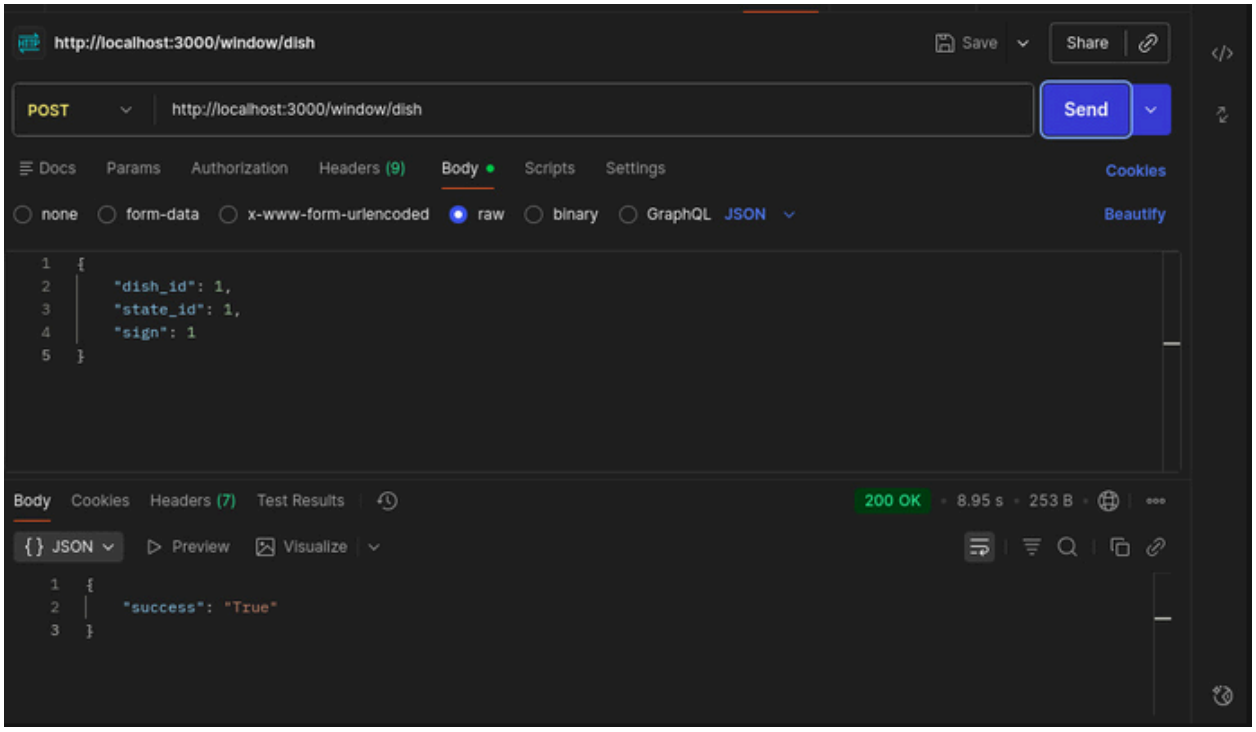


- **Dish Alteration**

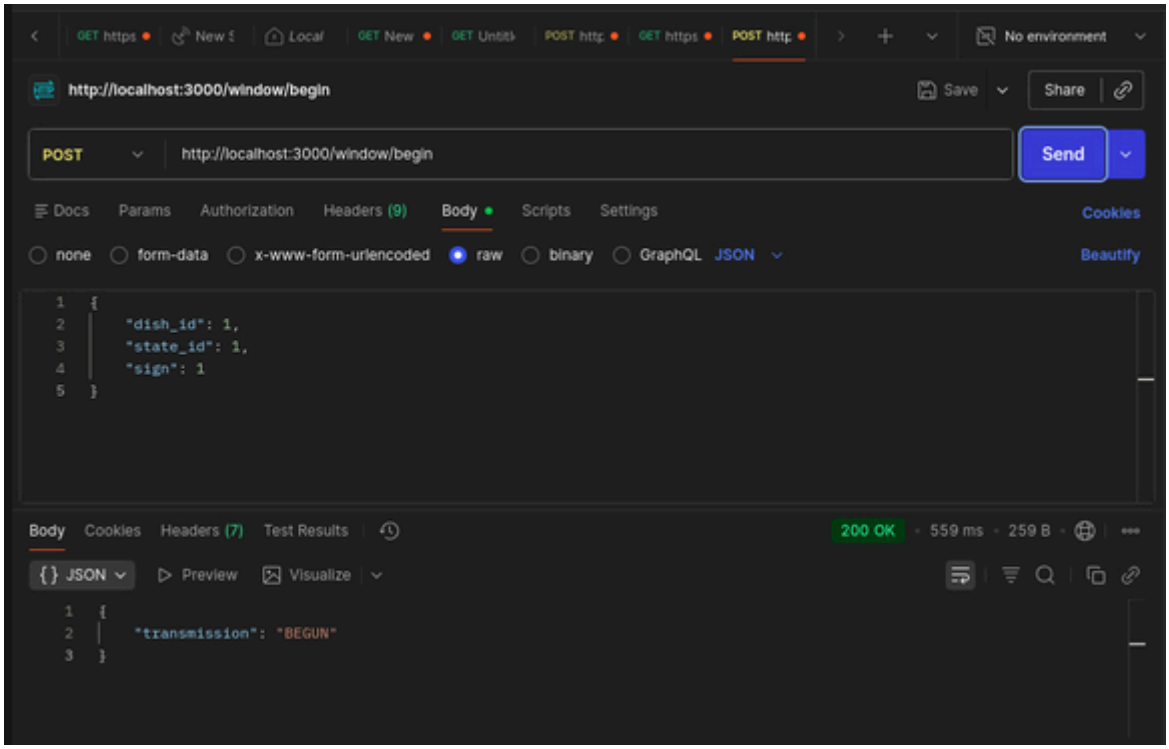
Ensure enough personnel are working

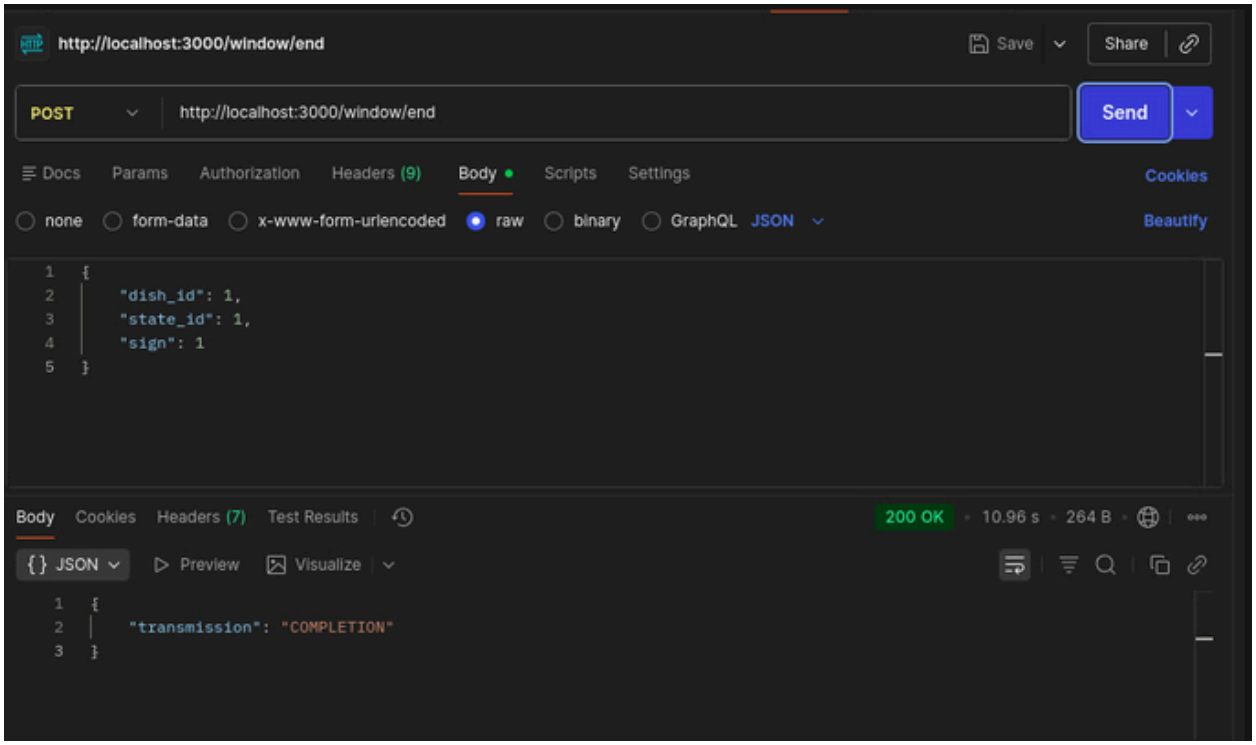


Once enough personnel are added, a successful dish movement is achieved



- **Begin Communication**



[Communication of commands in between]


- **End Communication**
